DETAILED ACTION

Response to Amendment

1. This Final office action is in response to Applicant's amendment filed 12/21/10. Claims 64, 80 and 109 have been amended. Claims 64-94 and 109 are pending.
2. The previously pending rejection to claim 109 under 35 USC § 101 has been withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
4. Claims 64-94 and 109 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 64, 80 and 109 recite anonymously intercepting and capturing each packet received from a Web user having a permanent anonymous user identifier at an Internet Service Provider (ISP) point of presence (POP) prior to each packet from the Web user being routed over the Internet, analyzing each of the intercepted and captured packets to identify packets having headers associated with

Web page requests, extracting, at the ISP POP, a Uniform Resource Locator (URL) of the requested Web page and a current IP address of the Web user from the headers identified to be associated with Web page requests, processing the current IP address extracted from the captured headers to correlate the current IP address extracted from the captured headers with a permanent anonymous user identifier using a cross-reference table at the ISP POP, associating each extracted URL with the permanent anonymous user identifier correlated with the current IP address extracted from the captured headers, for each permanent anonymous user identifier correlated with the current IP address extracted from the captured headers, storing the URL of the requested Web page and the permanent anonymous user identifier correlated with the current IP address extracted from the captured headers at the ISP POP, (emphasis added to most pertinent portions of the amended claims), which does not seem to be supported by the specification, drawings or claims, as originally filed.

Dependent claims 65-79 and 81-94 are rejected based upon the same rationale.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
